DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

The Devonshire House c. 1875-1877 is located on Oakwood Road just east of Pilot. The 2 story frame dwelling faces south with a east/west roof line.

The main 3 bay by 2 bay structure has a 2 bay by 2 bay addition to the east. Attached along the entire north side of the house is a single story shed addition and to the south a single story shed roof porch. A change in grade necessitated a stepdown with both additions and porch.

The house rests on a uncoursed fieldstone foundation and is sheathed with imitation brick tile. The roof is of medium pitch with a asphalt tile and interior end stuccoed strethcer bond stove stacks.

The south facade has a central door to the main part of the house and 6/6 sash on both first and second floors. The trim on both windows and doors is plain. There is a small boxed cornice. The addition possesses an outside entrance to the western part of the two bays. Its second floor sash are 3/6 while its first are 6/6. The roof to the addition is covered with tin. The front porch has champhered pillars.

Although entry was not gained, late 19th century detailing of no particular significance could be seen.

Pilot Town

CE- 840, 842,843, 844, 845 (log house), 846, 847(school no. 3), 848, 849(store), 850, 851, 852, 853(Johnson Victorian), 854, 855, 856, 857, 858, 859, 860, 861, 862, 863.

Pilot Town owes its existence to two primary reasons: The first is the 19th Century mining activity in the area and the second is the shift of the Susquehanna crossing from the Bald Friar ferry to the town of Conowingo. The road from Pennsylvania to the Bald Friar ferry passed west of the present Pilot Town crossroads. It is obvious that this route predated any other southerly route in the vicinity especially since the earlier farms and houses are oriented to it. St. Patrick s Church (CE-834), Pembrace Farm (CE-836), Moore-Love log house (CE-845), and the Fulton-Alexander House (CE-841) all date from before the mid 19th Century and stand near or next to the earlier route. to the treacherous decent to the ferry and easier access at Conowingo a covered bridge was built across the Susquehanna at Conowingo, which eclipsed ativity at Bald Friar. With the construction of a bridge at Conowingo a more direct southerly route from Pennsylvania was needed, which necessitated an easterly shift in travel. It amounted to a difference of a few hundred yards but was enough to form an intersection with the east/west Mount Pleasant road. Continued interest in the mining of feldspar, soapstone, and gravel in the mid 19th Century brought more development and change. Pilot Town was a definite result of these two factors and the mid to late 19th Century housing that exists today is ample evidence for this occurrence. Pilot Town supported a local market till the early 20th Century (CE-849) and its own school (CE-847) till about the same time.

The houses that make up Pilot Town are traditional two Aframe structures that one sees throughout Cecil County. (see CE-840, CE-842, CE-844, CE-846,

CE-848, CE-851, CE-852, CE-853, CE-854, CE-855, CE-856, CE-857, CE-858, CE-859, CE-860, CE-861, CE-862, CE-863) The structures are basically plain straightforward buildings that are typical houses for workers in a mining area. This is not to say that the previous agricultural life of area was replaced by the mines. The farming community continued as it had since the late 18th Century but now alongside mining operations that brought Irish immigrants in the early 19th Century.
